A B O U T M E

I am an architect from Mumbai, India currently enrolled in M.Arch program at SoA at CMU. After graduation, I worked in Ahmedabad and Mumbai for a few years where I was exposed to a variety of architecture, urban design, landscape and master planning projects of variety of scales and sizes. I believe this was the most period of my life wherein I found myself in rough waters and learnt how to swim. It taught me not just skills and wisdom of architectural world but also discipline, rigor, perseverance, courage and most importantly how to be a good human.

I have always been a curious mind, looking forward to learn and grow by observing and absorbing from the everyday encounters with architecture, art, music, city and people. Given a chance, I would love to adopt a village and enable it to become sustainable, self dependent and zero emission village.
